# AIR-CRAFTGLASS: AN EVOLUTION IN DESIGN AND MATERIAL

AIR-CRAFTGLASS™

Natural Collection

With its Natural Collection – ‘Created by nature perfected by AIR-CRAFTGLASS’ – we were rewriting aviation history and we were nominated by “Crystal Cabin Award 2017”, “German Design Award 2018” and “Yacht & Aviation Awards 2018”. Until recently there were only a few types of wood available and certifiable for aviation. Now we offer a selection of over 300 types of wood and colours of veneer.

A true revolution in the applicability of real glass in the highest level of finish, the AIR-CRAFTGLASS Collection features the most glass solutions that offer low weight, high strength and genuine interior comfort.

AIR-CRAFTGLASS Unique innovative products: silver mirrors and real wood.

## INTRODUCTION

AIR-CRAFTGLASS is the real glass that designers, architects, completion centres and OEM's have been waiting for.

For spectacular projects that meet the strictest certification requirements in the aviation industry, AIR-CRAFTGLASS is the most complex glass available and suitable for a wealth of applications in aviation.

In addition to transparent glass applications for dust panels, class dividers, monitor fronts and frameless shower doors, we also produce mirrors with real silver (the only one in the aircraft industry) for lavatories or commercial cabins such as kitchens and much more besides.

## TECNOLOGY & INNOVATION.

AIR-CRAFTGLASS is a leading supplier of its unique glass (patented) to the aviation industry. We have partnerships with leading OEM manufacturers and their subcontractors to provide superior solutions in terms of aesthetics and comfort levels, ensuring passengers a more pleasant flight experience. We also assist OEM efforts in achieving national and international regulatory requirements.

We are recognized as a provider of glass products which look great and offer a durability that is second to none. Our AIR-CRAFTGLASS is used to create cleanable, durable, lightweight interior transparencies and surfaces on private, VIP, OEM's and commercial aircraft and offer an excellent value proposition in the process.

Manufacturing facility AIR-CRAFTGLASS

## LOCATION

The factory where we assemble all our AIR-CRAFTGLASS products is situated in Turnhout, Belgium. Turnhout is located at the heart of the triangle formed by Eindhoven (The Netherlands), Leuven (Belgium) and Aachen (Germany). Our production facility is located on the Philips manufacturing campus, which has a surface area of 18,5 hectares and includes some 85,000 m2 of buildings. AIR-CRAFTGLASS therefore has highly flexible expansion options available without having to move to a new production site in the future.

## ENGINEERING

AIR-CRAFTGLASS has its own crew of engineers who will support you during the entire process, from concept to the delivery of a certified product. As glass is a reasonable new material in the aviation, and the applicability of our products is subject to specific requirements, their knowledge is invaluable to the success of your and our mission.

High speed camera test facility

## PRODUCT CERTIFICATION

AIR-CRAFTGLASS has its own production testing department and access to certified testing equipment on the premises for carrying out mechanical and environmental tests. We are familiar with making test plans in accordance with EASA and FAA standards and with authorization by EASA and FAA witnesses. This makes confirming the applicability of our products as easy as possible. All our glass products meet the certification requirements imposed by the EASA and FAA.

## ISO9001:2015 CERTIFICATION

AIR-CRAFTGLASS is ISO9001:2015 certified and has a proper IMS (Integrated Management System) in place. Management and the rest of the company, from office to production staff, have a strong focus on quality. This underlined by the procedures that apply across the entire AIR-CRAFTGLASS organization.

*AIR-CRAFTGLASS sets a formidable new standard for creating a unique flight experience.*
